Subject: Mark your calendar to vote on May 21st

Frances,

Did you know that May 21st is a primary election in Pennsylvania? If not, be sure to mark your calendar. Voting next week could decide some very critical issues that affect our clean air, land and water.

Good environmental policy starts at the local level and that's why your vote in the municipal primary really matters.

[Will you take the pledge the vote?](#)

Recently, through Act 13, Harrisburg and the natural gas industry attempted to take zoning control away from townships across the state. Fortunately, the courts have blocked those efforts, and control remains in the hands of our local elected officials. If you don't want fracking in your backyard, it is critical that you vote and elect strong environmental champions at every level of government.

Make a plan to vote on May 21.

[Take the pledge here and we will send you a reminder on Election Day that you can share with your friends.](#)

Thanks for all you do to protect natural resources in Pennsylvania. Don't forget to vote!

Cheers,

Josh and Molly

P.S. Forward this email to your friends and family to remind them to vote on Tuesday. Studies show that the best way to get out the vote is to hear from a trusted source like you!
